Hackfest Community Member

Geoff Newson

Principal Consultant with intive

- Used to write Java and C++
- Moved to the infrastructure side - storage, networks and linux
- Spend most of my working day with OpenShift
- Took part in the first Hackfest

Hackfest participation

QUESTION

How did I get involved in the Hackfest and why

?

How and why did I get involved?

- I work for a Red Hat partner who was invited to take part
- They asked for interested volunteers
- Opportunity to write some software
- Opportunity to learn some new stuff
- Real use case for new technologies
- Cool toys

QUESTION

What's it like to take part

What it's like to take part?

- Interesting and challenging
- Great introduction to the tech
- Outline of the use case and starters
- Weekly guidance
- Slack community

Hackfest community

What is the community?

- Weekly meetings
- Looks at the technical side of the Hackfest
- Creates use cases
- Tries out tech that could be used in future Hackfests
- Dry runs Hackfest
- Supports participants

What have I got from the community?

- Fun to work with
- Learnt good practices and ways of working
- Exposure to technology
- Chance to do work different from the day job
- Support

What have I given back?

- Tekton build pipelines
- Additions to code
- My opinions

About intive

**We help customers transform
their business by designing & engineering
people-centric digital products.**

Who we are

intive is a fast-growing global technology company. We partner to the world's leading brands providing people-centric digital products. Together with many of our clients, we have built end-2-end tailor-made and complex solutions along the whole value chain of digital product creation.

With over 3.000 employees worldwide, we cover solutions for many industries from eCommerce to industrial and automotive, working in long-term partnerships with corporations and large enterprises such as BASF, Bayer, Continental, Vorwerk, adidas and BMW.

The best of both worlds

intive brings essential core competencies to the support of our clients: focus on products, radical user-centricity and strong expertise in infrastructure and cloud architecture.

Only through the perfect symbiosis of these areas the greatest possible potential can be exploited. Our experts have already proven their skills in numerous award-winning applications.

It is particularly important for us that our technology practices are always innovative and up to date. To maintain this cutting edge position we have a proven model to constantly re-evaluating new technologies and adapting best product development processes.

Passion for innovation

As one of the few digital service providers in Germany, we can offer an integrated design and development approach that is long-established and proven to work. In addition to outstanding product design expertise, we owe various awards to this successful model.

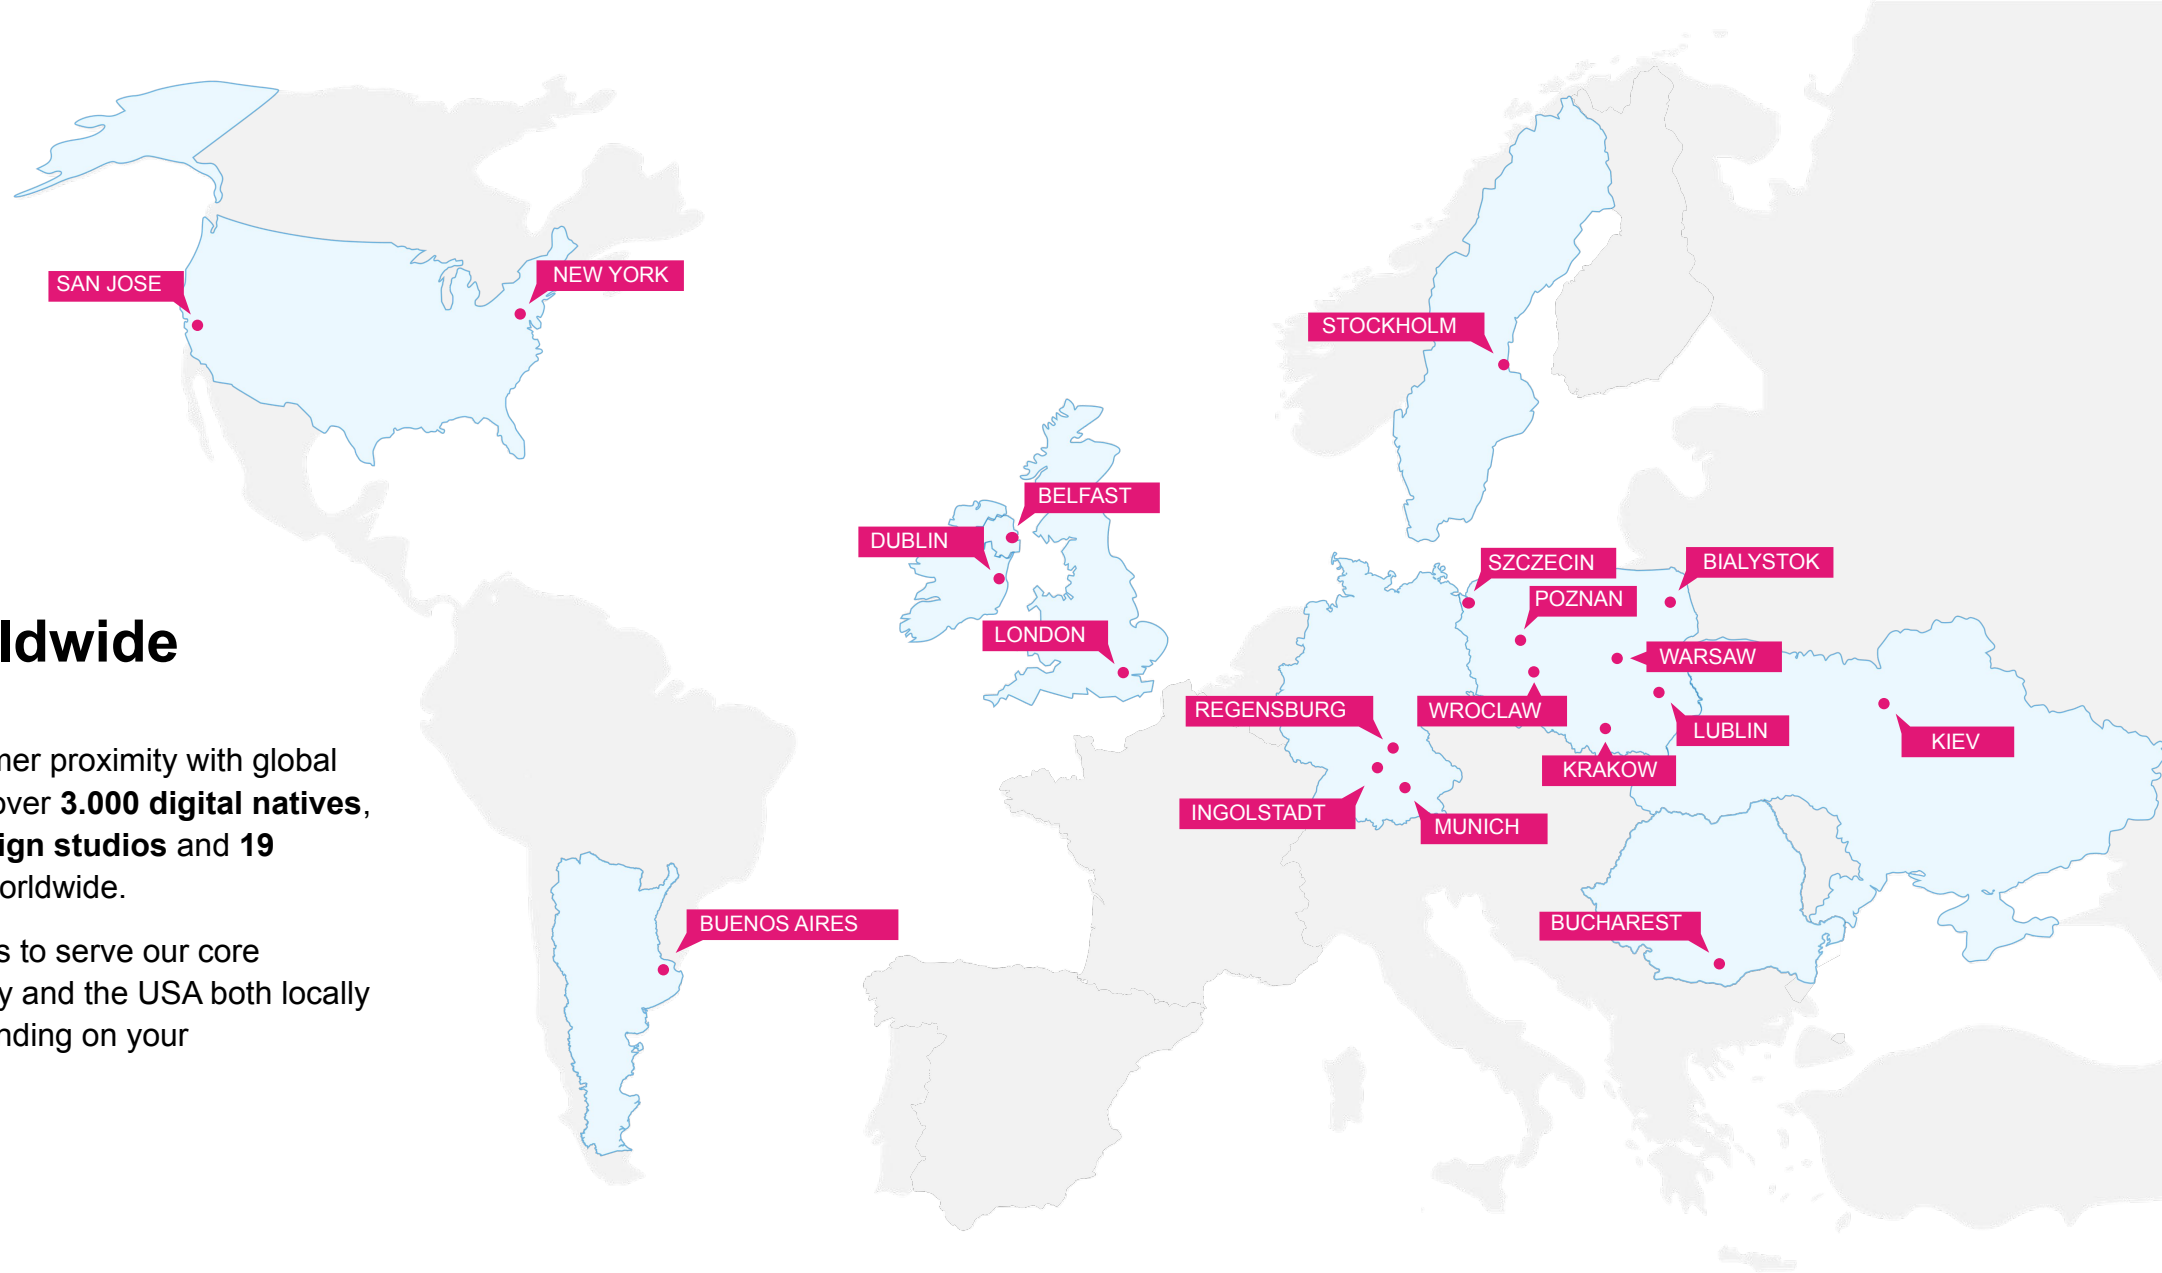

This holistic approach is the basis of all our projects, and for all future innovations around the digital product space. Coupled with our modern, technical solution approaches, which we regularly compare and adapt with our technology partners, we have been able to develop robust, durable and flexible solutions for years.

We want to share this passion for excellent digital products that inspire end users and help building holistic experiences with Merck.

intive worldwide

We combine customer proximity with global scalability. We are over **3.000 digital natives**, and combine **7 design studios** and **19 delivery centres** worldwide.

This setup allows us to serve our core markets of Germany and the USA both locally and remotely, depending on your requirements.

The building blocks of our success

Designing the right solution for our customers, both technically and from a user experience perspective, is our motivation. We have already received several awards for our user-centred design approach - and we are proud of this acknowledgement.

We also owe this success to a large number of selected partnerships with leading providers from the areas of infrastructure, eCommerce and content.

The development of business critical applications require highest level of operational proficiency. It is our drive and our responsibility towards our customers to ensure important certifications to be in place, keeping our standards as high as possible.

Client work

We have long-standing, successful client relationships at eye level with some of Europe's most renowned brands. From mobile ecosystems, modern headless systems to portals, B2B and B2E solutions, we work together to create the experiences of tomorrow.

From these collaborations, we have selected two references based on their relevance and Merck requirements. These are described at the end of this document. If required, we are happy to provide further reference projects.

Thank you

Red Hat is the world's leading provider of enterprise open source software solutions. Award-winning support, training, and consulting services make Red Hat a trusted adviser to the Fortune 500.
