

Edge overview and RH summit recap

Carlos Torres
EMEA Go To Market Specialist in Edge computing

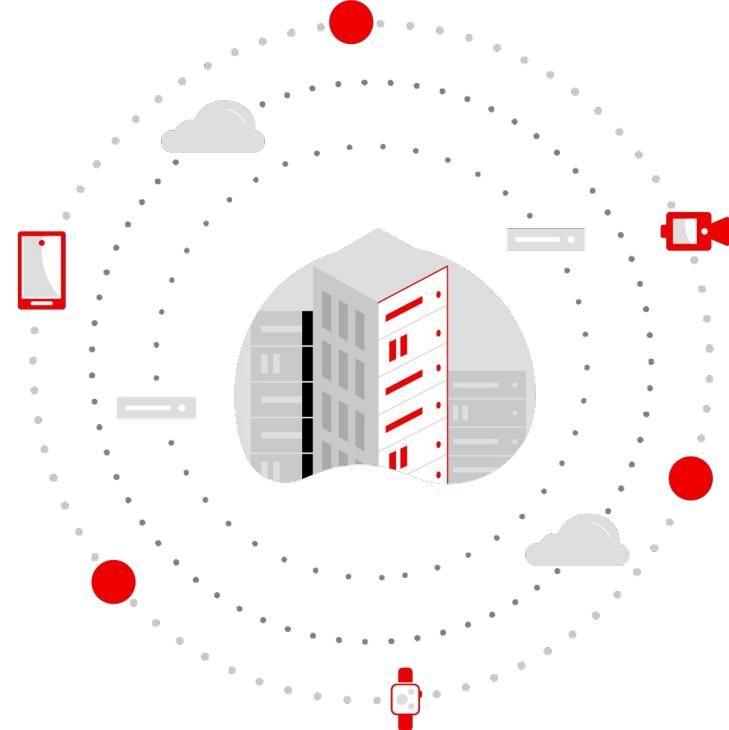

What are analysts saying about Edge computing?

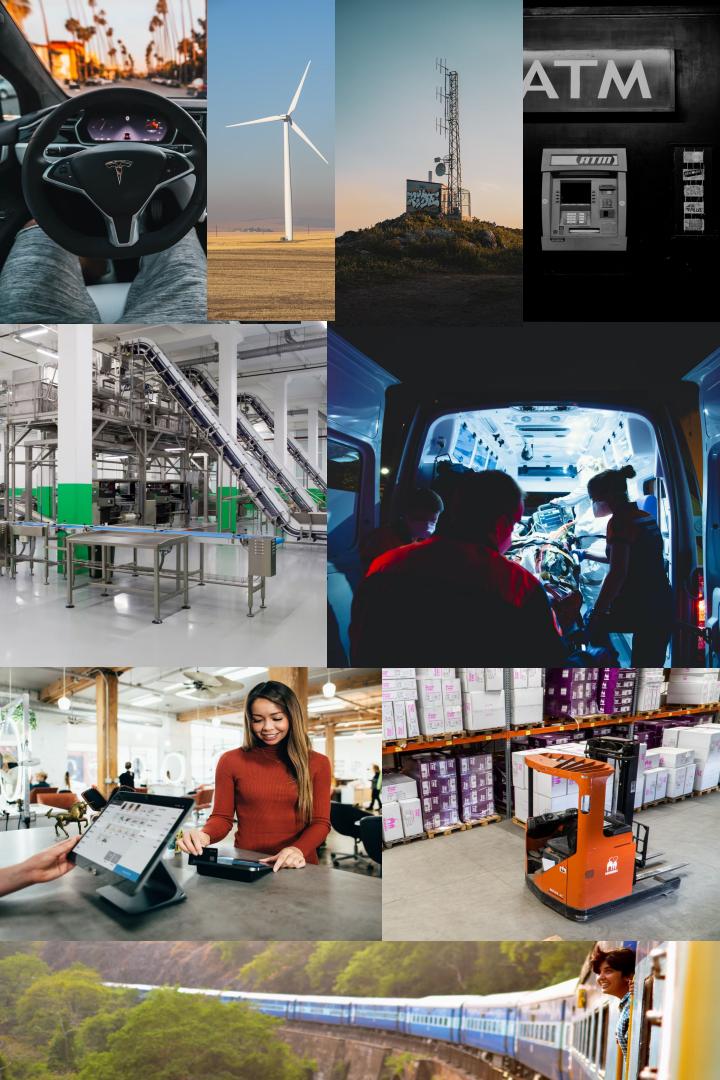

"96% of customer-obsessed firms adopt new technologies before their competitors do."¹

"800% increase in the number of apps deployed at the edge."²

"By 2025 more than 50% of enterprise-managed data will be created and processed outside the data center or cloud."³

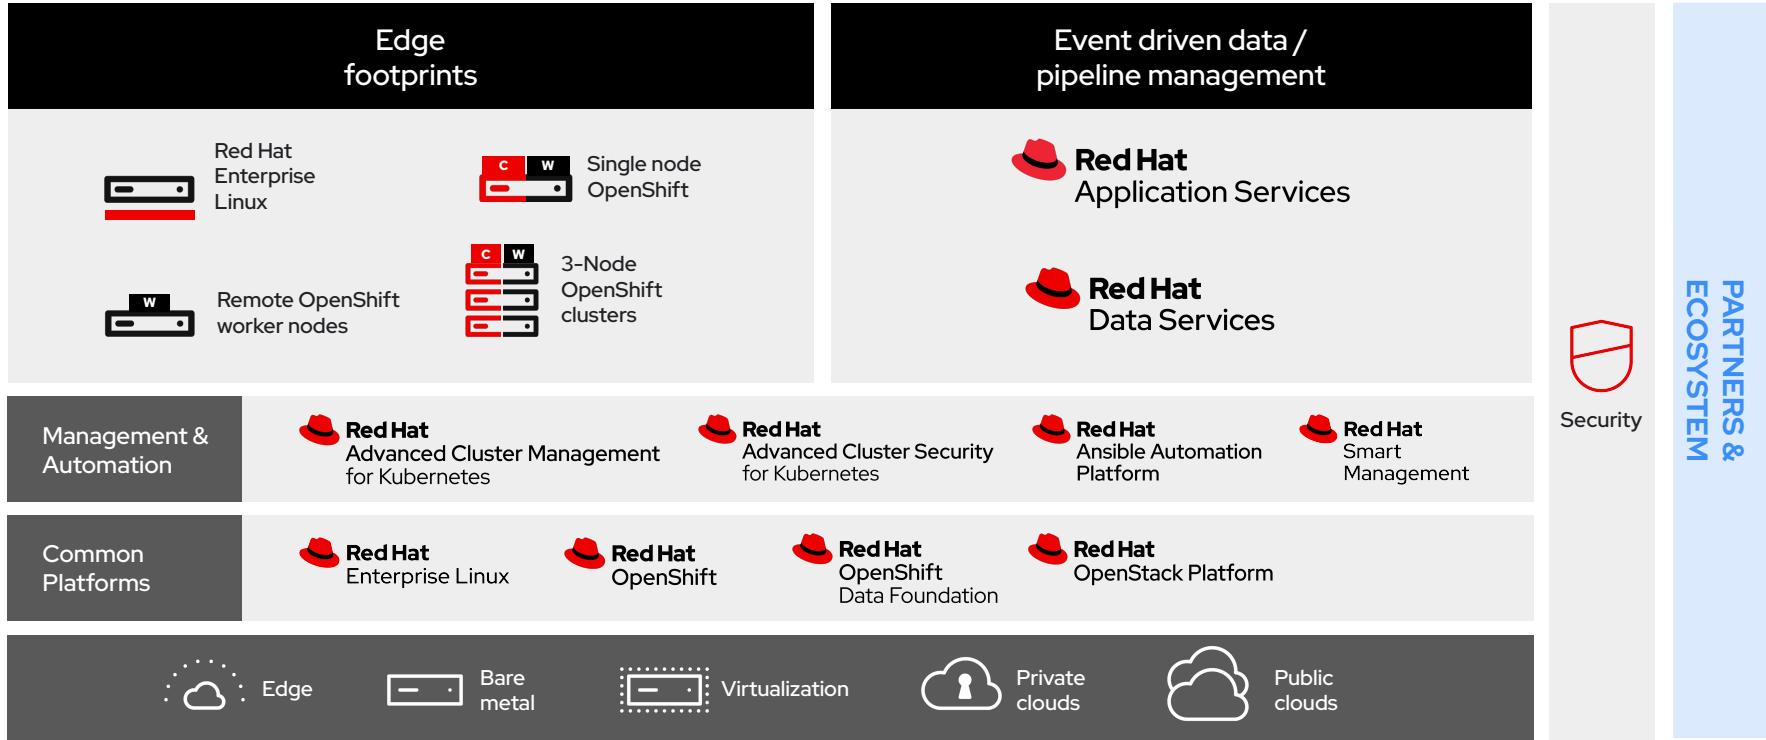

Key customer needs across common edge use cases

- Production and asset optimization
- Quality management
- Supply chain management
- Worker safety and productivity
- Real time decision making through advanced analytics

Red Hat Edge Computing portfolio

Red Hat partner ecosystem

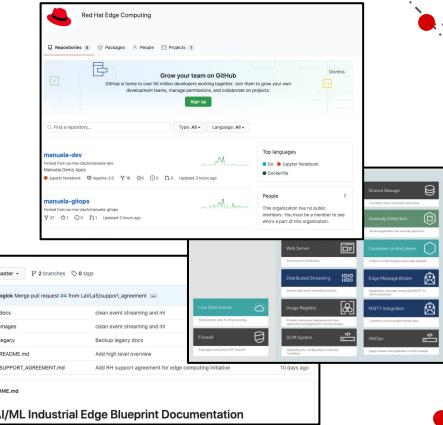

Edge adoption strategy

Validated Patterns : Simplifying the creation of edge stacks

Bringing the Red Hat portfolio and ecosystem together - from services to the infrastructure

Pattern as code

Go beyond documentation using GitOps process to simplify deployment

From POC to production

Ensure your teams are ready to operate at scale

Highly reproducible

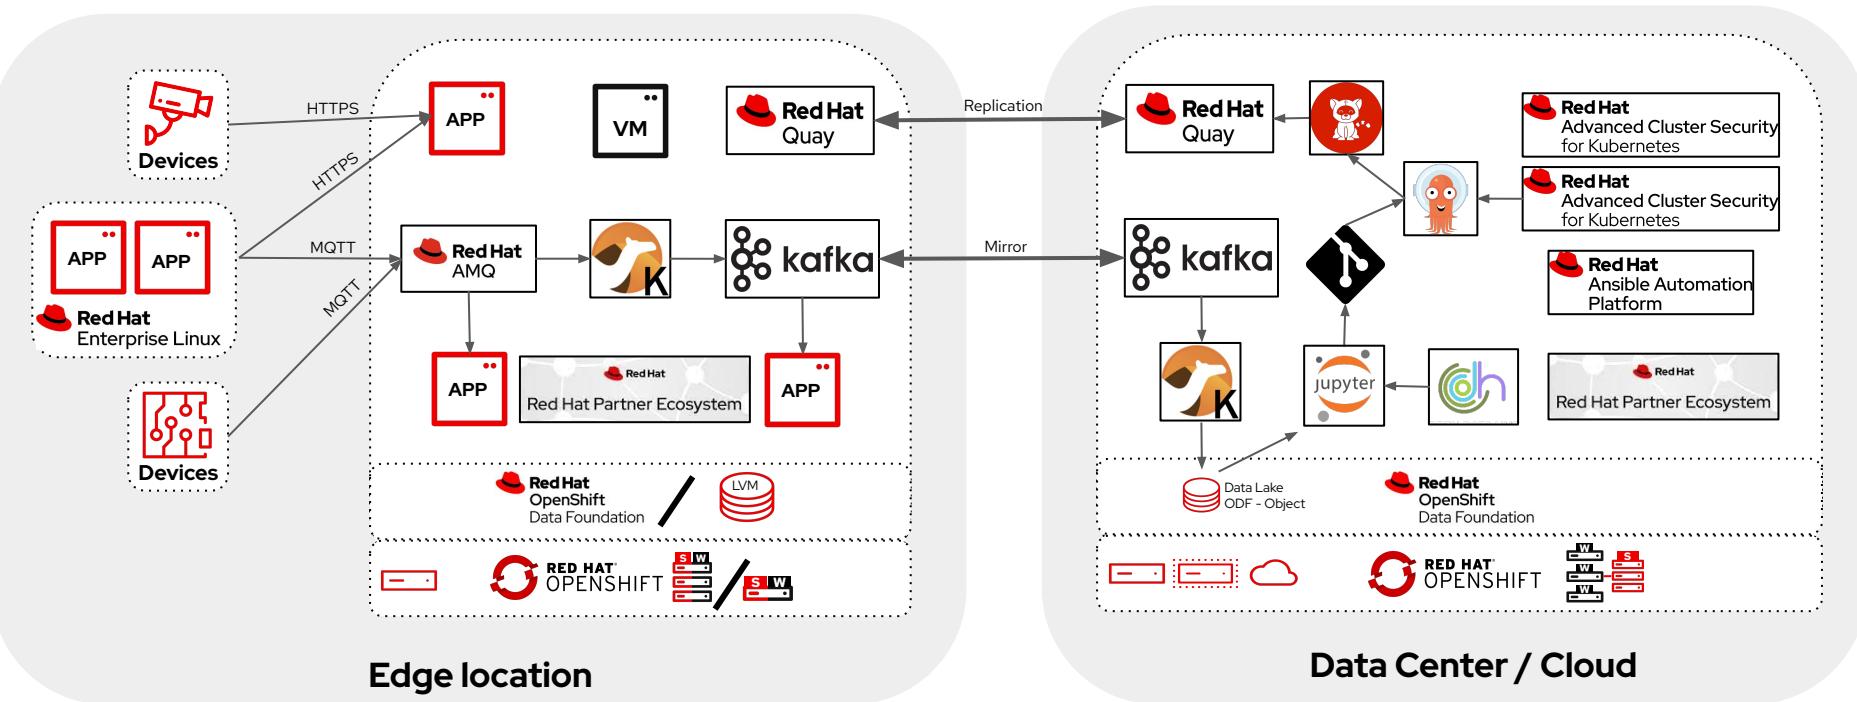

So that you can scale out your deployments with consistency

Open for collaboration

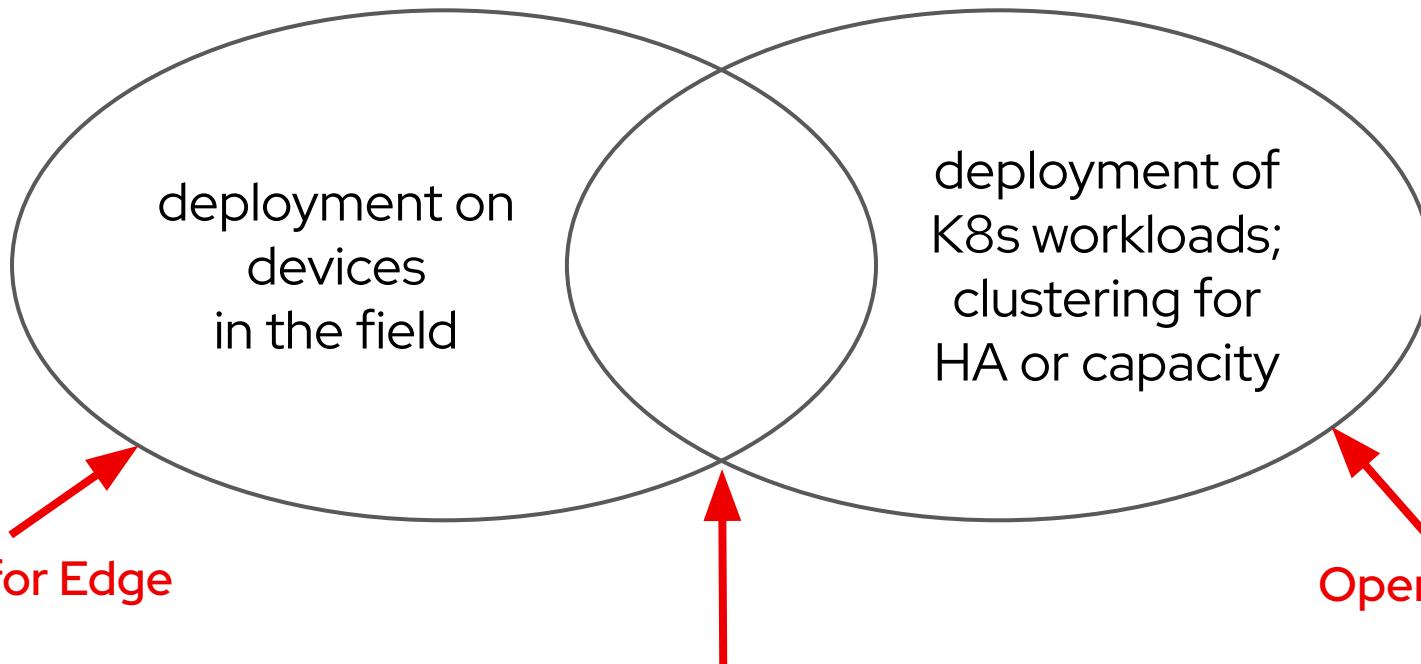

Anyone can suggest improvements, contribute to it

Validated pattern: Industrial Edge

Requirements of customer edge computing use cases

Red Hat Summit and Edge sessions

Red Hat Summit recap

Deliver care anywhere with edge computing
and AI automation

Digital transformation at the edge with Red
Hat and Intel® Edge Controls for Industrial

Enabling intelligence in the radio access
network (RAN)

Evolving 5G networks toward fixed and mobile
convergence

Mamram unit responds quickly to mission
changes with edge computing

**Tackle scale and complexity in
your edge deployments with
new Red Hat edge
management services**

A half-day virtual event
1st June 2022 from 10:00 (CEST)
